Xiaomeng Liu

11 Oxford St, LISE 406, Cambridge, MA 02138
E-mail: xiaomengliu@g.harvard.edu
Webpage: http://xiaomengliu.com

Personal Profile:

I am Ph.D. student at Harvard University specialized in experimental condensed matter physics. My current research directions are quantum Hall effect and exciton condensation in graphene heterostructures. Our experiments involve fabricating high quality graphene devices and conducting low temperature transport measurements. I also have various design and fabrication skills related to or outside of my research area.

Education:

Harvard University	Physics	Ph.D. candidate	07/2014 – Present
Ph.D. Adviser: Philip Kim			
Columbia Univeristy	Applied Physics	Ph.D. candidate	09/2012 – 06/2014
Columbia Univeristy	Applied Physics	M.S.	09/2012 – 05/2013
Peking University	Physics	B. S.	09/2008 – 06/2012

Publications:

Presentations:

"Quantum Hall drag of exciton condensation in bilayer graphene double layer" APS March Meeting, March 2017

"Exciton superfluidity in graphene double layers" BACON+ Meeting, Sep 2016

"Coulomb drag and exciton condensation in graphene quantum hall double layers" ICPS, Aug 2016

"Anomalous Coulomb drag in bilayer graphene double layers" APS March Meeting, March 2016

"Anomalous Coulomb drag in bilayer graphene double layers" Big Ideas in Quantum Material, Dec 2015

"Coulomb drag in graphene quantum Hall bilayer systems" APS March Meeting, March 2015

"Magneto and Hall drag in graphene double-layer" APS March Meeting, March 2014

Expertise:

Graphene *2D heterostructure stacking* *Cryogenics (VTI, He3 and dilution-refrigerator)*

Nano-fabrication *Quantum Hall effect* *Low-noise electrical measurements*

Condensed Matter Physics *Matlab* *Electronics*

Skills:

Machining (CNC Mill, Lathe, laser cutter) *2D&3D modelling (AutoCAD, Fusion360, Solidworks)*

C *Web designing (html, css, bootstrap, Wordpress)* *Circuits design (EAGLE CAD)*

Embedded system and programming (AVR microcontroller, AVR-C) *Illustrator&Photoshop*
