RESEARCH INTERESTS

I am a condensed matter experimentalist seeking to discover, understand and manipulate quantum states of matter with low-temperature transport and scanning probe microscopy techniques. My expertise in van der Waals (vdW) heterostructure assembly allows me to construct quantum materials layer-by-layer, affording great control in designing properties that promote the emergence of new quantum phases. Interested quantum states of matter include exciton condensation, unconventional superconductivity, magnetism, topological orders, and strongly correlated electron states.

EMPLOYMENT

2019 - Present **Princeton University**, Princeton, NJ
Princeton Materials Science Postdoctoral Fellow
Advisor: Prof. Ali Yazdani

EDUCATION

2019 **Ph.D. in Physics, Harvard University.**
Thesis: "Correlated Electron States in Coupled Graphene Double-layer Heterostructures"
Advisor: Prof. Philip Kim

2013 **M.S. in Applied Physics, Columbia University.**
Advisor: Prof. Philip Kim

2021 **B.A. in Physics, Peking University.**

PUBLICATIONS

Summary: 15 publications (7 first-author publications), including 3 in Nature, 3 in Science, 3 in Nature Physics, with over 2000 total citations. Google Scholar: [\[Link\]](#).

(†Corresponding author; *equal contribution).

Selected Publications

1. **X. Liu***, G. Farahi*, C. Chiu*, Zlatko Papic, K. Watanabe, T. Taniguchi, M. Zaletel, A. Yazdani†. "Visualizing Broken Symmetry and Topological Defects in a Quantum Hall Ferromagnet." *Science* 375, 321-326 (2022), [\[Link\]](#).

PRESENTATIONS

Invited Presentations

AVS 68th International Symposium & Exhibition, Pittsburgh, PA, Nov 2022 (scheduled)

"Visualize emergent electron orders in two-dimensional quantum materials."

Gordon and Betty Moore Foundation EPiQS Postdoctoral Symposium, Beverly, MA, May 2022.

"Visualize emergent electron orders in two-dimensional quantum materials."

Seminar, University of California Riverside, Riverside, CA, May 2022.

"Visualize emergent electron orders in two-dimensional quantum materials."

Seminar, University of Washington, Seattle, WA, April 2022.

"Visualize emergent electron orders in two-dimensional quantum materials."

Physics Colloquium, University of Chicago, virtual, Jan. 2022.

"Visualizing emergent electron orders in 2D materials."

Condensed Matter Seminar, University of California Berkeley, virtual, Nov. 2021.

"Visualizing broken symmetry, topological excitations and Landau orbits in the graphene quantum Hall system."

MRSEC Meeting, University of Texas at Austin, virtual, Nov. 2021.

"Visualizing broken symmetry and topological excitations in a graphene quantum Hall ferromagnet."

APS March Meeting, Mar. 2020 (cancelled due to COVID).

"Spin-polarized correlated insulator and superconductor in twisted double bilayer graphene."

Emergent Phenomena in Quantum Hall Systems (EPQHS-7), Beijing, China, June 2019.

"Emergent phenomena in graphene double-layers: from exciton condensation to interlayer fractional quantum Hall effect."

Boston Area Carbon Nanoscience Meetings, Cambridge, MA, Oct. 2017.

"Novel Exciton Phases in Graphene Double-Layer Heterostructures."

Boston Area Carbon Nanoscience Meetings, Cambridge, MA, Sep. 2016.

"Exciton superfluidity in graphene double-layers."

Condensed Matter Theory Seminar, Harvard University, Cambridge, MA, Mar. 2016.

"Coulomb Drag and exciton condensation in graphene double layers."

Contributed Presentations

GRC on Two Dimensional Electronics Beyond Graphene, Manchester, NH, June 2022.

"Visualize emergent electron orders in two-dimensional quantum materials."

APS March Meeting, Chicago, IL, Mar. 2022.

"Scanning tunneling spectroscopy of quantum Hall ferromagnetic states in graphene."

APS March Meeting, Boston, MA, Mar. 2019.

"Spin-polarized correlated insulator and superconductor in twisted double bilayer graphene."

KITP Workshop: Correlations in Moire Flat Bands, Santa Barbara, CA, Jan. 2019.

"Spin-polarized correlated insulator and superconductor in twisted double bilayer graphene."

23rd International Conference on High Magnetic Fields in Semiconductor Physics, Toulouse, France, June 2018.

"Observation of interlayer anyon pairing through fractional quantum Hall drag."

GRC on Two Dimensional Electronics Beyond Graphene, Easton, MA, June 2018.

"BEC-BCS crossover of exciton condensation in graphene double-layer."

APS March Meeting, Los Angeles, CA, Mar. 2018.

"BEC-BCS crossover of exciton condensation in graphene double-layer."

APS March Meeting, New Orleans, LA, Mar. 2017.

"Quantum Hall drag of exciton condensation in bilayer graphene double layer."

33rd International Conference on the Physics of Semiconductors, Beijing, China, Aug. 2016.

"Coulomb drag and exciton condensation in graphene quantum hall double layers."

APS March Meeting, Baltimore, MD, Mar. 2016.

"Anomalous Coulomb drag in bilayer graphene double layers."

Big Ideas in Quantum Material, San Diego, CA, Dec. 2015.

"Anomalous Coulomb drag in bilayer graphene double layers."

APS March Meeting, San Antonio, TX, Mar. 2015.

"Coulomb drag in graphene quantum Hall bilayer systems."

APS March Meeting, Denver, CO, Mar. 2014.

"Magnetoelectric Hall drag in graphene double-layer."

TEACHING & ADVISING EXPERIENCE

Teaching Assistant

Responsibilities included leading class discussions, supervising labs, grading assignments, and meeting with students individually

- Solid State Physics I (Fall 2012), Columbia University
- Applied Physics Laboratory (Spring 2013), Columbia University

Mentoring

Two undergraduate students and one graduate student at Harvard University, two graduate students at Princeton University, including three women.

PROFESSIONAL SERVICE

Journal Reviewer

Nature, Physical Review Letter, Nature Communications, Nano Letters, Physical Review B, Applied Physics Letters, Synthetic Metals and Transactions on Electron Devices.

Leadership

Session Moderator, AVS 68, Nov. 2022

Discussion Leader, Gordon Research Seminar, June 2022

Session Chair, APS March Meeting, Mar. 2022

Organizer, Princeton Summer School on Condensed Matter Physics, June 2020

Organizer, Kim-Yacoby condensed matter journal club

FELLOWSHIP

Princeton Materials Science Postdoctoral Fellowship, 2019-2022
